## EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: The title has been changed to "LCD with relay layer connecting pixel electrode with storage capacitor that also covers the storage capacitor"

The following is an examiner's statement of reasons for allowance: Regarding claims 1, 3-9, 11-19, 21-22, and 25, there is no prior art of record that teaches all the limitations of the claims especially a storage capacitor electrically connected to TFT and pixel electrode, and **a relay layer that electrically connects the pixel electrode and the storage capacitor that at least partially covers the storage capacitor to shade the storage capacitor.**

The prior art of record (Sato as previously cited) teaches a relay layer connecting the pixel electrode and storage capacitor however this relay layer does not shade the storage capacitor as it is formed below the storage capacitor layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
